THREE

THREE CELLULAR ABSORPTION TECHNOLOGIES

1. **Yeast Glycoprotein Matrix (GPM)** – Vitalité-- Naturally, sourced vitamins and minerals from yeast, complexed with glycoproteins for enhanced cellular absorption.

2. **Liposomes** – Purifí, Revíve, Imúne, Éternel-- Encapsulation technologies that aid in transporting nutrients across cell membranes.

3. **Micelle Technology** – Revíve-- Micelles are microscopic structures that surround fat-soluble nutrients, making them easier to absorb in the watery environment of the digestive tract.

4. **Adjuvants** – Revíve, GLP THREE™-- Compounds that enhance the body's ability to absorb and utilize nutrients more effectively.

5. **Chlorophyllin** – Purifí-- A water-soluble form of chlorophyll known for its antioxidant properties and potential to support cellular detoxification.

6. **Fulvic Acid** – Purifí-- A naturally occurring compound that helps transport nutrients into cells and supports detoxification processes.

7. **Polyphenol Complexation** – Vitalité, Collagène, Éternel, GLP THREE™, Kynetik-- Nutrients are paired with antioxidant-rich polyphenols, improving stability and absorption.

8. **Hydrolysis** – Collagène, Éternel-- A process that breaks proteins (like collagen) into smaller peptides or amino acids, making them easier for the body to absorb.

9. **Micronization** – Collagène, Éternel-- Encapsulation technologies that aid in transporting nutrients across cell membranes.

10. **Enzyme Delivery Technology** – Vitalité, Purifí-- Uses specific enzymes to pre-digest nutrients, making them smaller and more bioavailable for the body to absorb.

11. **Chelated Amino Acids** – Imúne-- Minerals are bonded to amino acids to improve stability and enhance their absorption in the digestive tract.

12. **Molecular Shuttles** – Visage Super Serum-- Specialized compounds that bind to nutrients and escort them directly into cells, improving the efficiency and precision of nutrient delivery within the body.
